Subject: 16/00346/MOUTE - hybrid planning application - land south of Thornton Road Industrial Estate.

The council supports Sylvatech's application to develop a 6.6ha site to the south of the Thornton Road Industrial Estate for their own production requirements, and for the western part of the site to be granted outline planning permission for business and industrial units. The development would both strengthen Sylvatech as a business and, once the business and industrial units were available, create employment opportunities for local people. The council thought the company's proposed production building would complement the structures on the adjoining industrial estate and be screened by the landscaping scheme which, in itself, would enhance the developed site and support local wildlife.
