

ANNEX A

Creative Economy Commissioning Proposals 2017/18: Recommendations

RDC Priorities:

- i. Working towards the concept of 'hubs' for creative economy activity in Ryedale, with potential to develop this at existing centres in the north and south of the District. The provision of a virtual hub should also be progressed.
- ii. A greater link between the creative and visitor economy should be sought, to improve the economic benefit of arts and heritage to the locality.
- iii. Support should be provided for creative individuals, businesses and enterprises to foster business growth.
- iv. Support should be provided to allow social enterprises to develop new audiences (contributing to economic sustainability moving forward)
- v. A small-scale grant scheme should continue, to provide support for new, innovative projects or pump priming projects.
- vi. Enterprises should work collaboratively to improve joint action and reduce duplication.
