Lizzie

Please find below the parish Councils comments

The council has no objection to the proposed development and on a whole see this as a good development for the area improving the facilities and safety of the site.

However there does not appear to be any consideration to the waste water that will be generated particularly from the proposed car wash.

The application (section 14/15) does not detail any proposal for water control. The council felt this should be included to control waste water and rain water run off. In order to minimise environmental impact we would have expected water soak away and processing of the car wash waste water.

If the water is all to be routed to the mains sewer this may cause unnecessary volume increases to the system which in other areas we have seem cause pumping station overflow etc.

Mike Peirson

Chairman

Aislaby Middleton & Wreton Parish Council
