Dear Sir/Madam

**CONSULTATION: PROPOSED EXPERIMENTAL ONE-WAY SYSTEM, ST. NICHOLAS STREET,  
NORTON-ON-DERWENT**

Please find attached a plan showing a proposed experimental one-way system for St. Nicholas Street in Norton-on-Derwent.

The proposal is to introduce a one-way stretch of road on an experimental basis from the junction with Welham Road to the car park. The permitted direction of travel would be from Welham Road towards Langton Road; two-way traffic would be maintained from Langton Road as far as the car park entrance. The aim of the one-way system is to discourage the use of this residential street by through traffic.

An experimental Order can run for up to eighteen months, during which time traffic flows can be monitored and comments from interested parties collected. At the end of the experimental period the decision would be made whether to make the one-way system permanent.

To enable the proposal to be progressed I would be grateful to receive your comments in writing before the end of the year.

Yours sincerely

*Philip Sharp*
