

NOTES

TYPICAL DETAIL A TO PROPOSED PONDS
1:25

PROPOSED PONDS DESCRIPTION

The ponds will be between 0.8 and 1.5 metres deep and have a gradual slope from the banks to the middle in order to encourage Turtle Doves to come and drink at the waters edge. The banks will be vegetated on one side and gravel and sand on the other in order to give the best conditions for Turtle Doves.

The pond spoil will be spread in the vicinity of the surrounding pond areas, away from mature trees, to landscape the site, and will be replanted with wild flowers and grasses. The spoil will not be taken off site.
