

Appendix 3 – Draft Priorities for the Council Plan 2019-2023

A great place to grow business, work and visit

We will promote and deliver economic growth, working with businesses and creating high quality, high paying jobs that benefit all of Ryedale's communities

We will support the prosperity of our attractions and market towns through promoting Ryedale as a 'must experience' place for food, family days out and the great outdoors.

A great place to live

We will support access to housing, setting exceptional standards in homelessness prevention and affordability.

We will promote health and well-being across Ryedale's communities so everyone has the opportunity to enjoy and contribute to the place they live in.

We will use our power and resources to keep Ryedale's environment clean, green and safe.

Shaping the future

We will act commercially and be business-like, investing in new technology, initiatives and infrastructure where this benefits local people and represents good use of public money.

We will coordinate and collaborate with partners, joining up our work programmes and resources where this brings benefits for local people and communities.
