Marginal and Emergent Seed Mix — 970tm2

Marginal and Apadic seed mix to mer margin and borrow pil areas to be sown at 4 go or mi2. Supply of grass seed mines for emergent seas use formogate EM8 (blesdoor mixture for wetlands) and EP1 (Porte dogs mixture) for the marginal water areas. Seed shall be sown in September. A seed certificate halle a supplied and will provide fid detail and information regarding certificate number supmer. One price wetget for ded supplied.

To support the seed mixes it will be necessary to include for marginal plugs speices to create a instant impact and provide cover for the seed mixes to establish. The table below shows the plug species to be used and following approval from EA a proposed detailed planting plan will be provided.

Species	Size	
Phalaris arundinacea	9cm	
Pharagmites australis	9cm	
Glyceria maxima	9cm	_
Juncus infexus	9cm	
Juncus effusus	9cm	
Carex paniculata	9cm	_
Carex hirta	9cm	
Iris pseudocorus	9cm	_

Embankment Species - 30092m2 Spillway Species - 12692m2
Embankments and spillway slope to be seeded using a seed mix to be agreed and approved

Reed Trasnlocation – 11380m2 Reeds to be translocated from local habitats

Scrub Natural Regen - 2318m2 Scrub to naturaly regenerate with areas as shown on the drawing

Date Valid 12/02/2020

REVISED PLAN

This design simply which will not be for the Cartes & Presidently, while three exhibits the common which will design the common of the Cartes of the Cartes
