

assessment and appropriate report be prepared regarding the detailed health of each tree as the available information at the present moment in time does not give our clients confidence that an appropriate assessment has been made in this respect. This would be in the interests of both the Local Planning Authority in the pursuit of the proposed protection of these trees and also our clients concerns over potential safety.

I trust that the above considerations can be borne in mind by Officers and Members as part of the consideration process of this Order and if you require any further information or clarification on the points raised by all means contact myself at the above offices.

Yours sincerely
